Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The abstract of the disclosure is objected to because the form and legal phraseology often used in patent claims such as "means" should be avoided.

Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Cowe et al (US Pat 5,671,362).

Re Claim 1: Cowe discloses a materials monitoring systems and related methods that can act as a call cycle setting device for setting a cycle for calling on a customer in the field of call sales in which a product is sold by being delivered and consigned to the customer comprising;

- First storage means for storing proposed call cycles that have been set in advance (Column 2, lines 11-14 "regular intervals")
- Means for inputting a consumed amount of the product when calling on the customer (Column 2, lines 11-14; "takes inventory")

Art Unit: 3628

- Second storage means for storing the input consumed amount (Column 2, lines 40-47)
- Means for acquiring a current consumed amount and a past consumed amount from the second storage means and calculating a rate of increase or decrease in the current consumed amount compared to the past consumed amount (Column 3, lines 9-23; specifically "item movement report of changes in said item inventory")
- Third storage means for storing the calculated rate of increase or decrease (Column 3, lines 9-23)
- Means for acquiring both the rate of increase or decrease from the third storage means and the proposed call cycles from the first storage means and setting the call cycle corresponding to the rate of increase or decrease (Column 3, lines 29-37; "initiate replenishment")
- Means for outputting the set call cycle (column 3, lines 29-37)

Re Claim 2: Further method claim 2 would have been obvious from previously rejected system claim 1 and is therefore rejected using the same art and rationale.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy M. Harbeck whose telephone number is 571-272-8123. The examiner can normally be reached on M-F 8:30-5:00.
